

EcoCeres Launches Position Paper Supporting Reforms to Strengthen EU Verification System for Sustainable Biofuels

Hong Kong, 15 July, 2025 – EcoCeres Inc., a leading pure-play renewable fuel producer, announced the release of its Position Paper emphasizing the need for fair, effective, and fraud-resistant certification protocols for sustainable biofuels within the European Union (EU).

As Europe accelerates its transition to renewable energy, ensuring the authenticity and integrity of sustainability claims becomes more important than ever. EcoCeres' Position Paper underscores the importance of implementing verification mechanisms that are transparent, equitable, and resilient to fraud, thereby safeguarding the credibility of the biofuel market, supporting environmental goals, and fostering trust among consumers and industry stakeholders.

Key Highlights of the Position Paper include:

- Supports EU Reforms for sustainable biofuel verification, emphasizing fairness and anti-fraud measures.
- Call for fair and uniform rules applicable to both EU and non-EU producers/operators and all feedstock types.
- Cautions against overly burdensome controls that could disrupt supply, especially for limited supply products like sustainable aviation fuel (SAF).
- Advocates for practical, transparent and recognized verification processes with stakeholder input.
- Advocates balanced roles for certification bodies and Member States.
- Emphasizes fairness in enforcement, especially certificate invalidation.
- Recommends building on existing system strengths and learning from national experiences.
- Supports reforms to improve the EU Biofuels Database (UDB) for better traceability.

"EcoCeres firmly believes that a credible verification system is fundamental to realizing the EU's ambitious climate and sustainability goals," said Matti Lievonon, CEO of EcoCeres. "As a producer committed to authentic waste-to-fuel pathways, we view rigorous certification not as a hurdle but as essential infrastructure for the renewable fuels market. Our position paper reflects our dedication to fostering a transparent, equitable, and fraud-resistant ecosystem for biofuels that benefits all stakeholders – from producers and policy makers to consumers and the environment."

EcoCeres encourages policymakers and industry stakeholders to review the Position Paper and consider its insights in ongoing discussions about reforming the EU's biofuel verification and sustainability framework. The document is available for download [here](#).

The company is committed to advocating policies that uphold integrity, promote innovation, and ensure the long-term sustainability of Europe's biofuel sector.

About EcoCeres

EcoCeres is a pure-play renewable fuel producer, with over a decade of experience in biomass utilisation, incubated by Towngas and backed by international investors Bain Capital and Kerogen Capital. Founded with a mission to address the challenges of climate change, EcoCeres has earned a reputation as a global innovator in the conversion of waste into renewable fuels, renewable chemicals and materials. As an ISCC-certified decarbonisation solution provider, the company produces industrial-scale sustainable aviation fuel (SAF), hydrotreated vegetable oil (HVO), and renewable naphtha through its proprietary processes. EcoCeres continues to drive the future of waste-to-renewable innovation, pioneering cutting-edge technologies to produce sustainable biofuels, including cellulosic ethanol derived from agricultural waste, turning today's waste into tomorrow's energy.
